

NOW AVAILABLE

ASME Journal of Engineering for Sustainable Buildings and Cities

*TIMELY

*ACCESSIBLE

*HIGH IMPACT

EDITORS

Jorge E. Gonzalez, PhD, FASME
The City College of New York, USA

Moncef Krarti, PhD, PE, LEED AP, FASME,
University of Colorado Boulder, USA

ASSOCIATE EDITORS

AIR QUALITY AND BUILDING ENERGY MANAGEMENT
K. Max Zhang, PhD
Cornell University, USA

BUILDING ENVELOPE MATERIALS AND COMPONENTS

John Z. Zhai, PhD
University of Colorado Boulder, USA

BUILDING EQUIPMENT CONTROL SYSTEMS

T. Agami Reddy, PhD
Arizona State University, USA

BUILDING INTEGRATED RENEWABLE ENERGY SYSTEMS AND EQUIPMENT

Andy Walker, PhD
National Renewable Energy Laboratory, USA

COMBINED HEAT AND POWER SYSTEMS FOR BUILDINGS

Ming Qu, PhD
Purdue University, USA

FAULT DETECTION AND DIAGNOSTICS OF BUILDING ENERGY SYSTEMS

Marco E. Sanjuan, PhD
Promigas S.A. E.S.P., Colombia

NEIGHBORHOOD AND CITY SCALE ENERGY ANALYSIS AND SIMULATION

Shiguang Miao, PhD
Institute of Urban Meteorology, China
Meteorological Administration, China

PHASE CHANGE MATERIALS FOR BUILDINGS

Yunho Hwang, PhD
University of Maryland, USA

The aim of *ASME Journal of Engineering for Sustainable Buildings and Cities* is to be the primary, high-quality resource for dissemination of research on integrated and sustainable building equipment and systems (ISBES) for individual buildings, as well as urban centers. The main topics of the journal are related to sustainable, resilient, and smart building energy systems including - but not limited to - innovative technologies to integrate various building components, accurate energy equipment and building energy modeling tools, efficient combined heat and power, cost-effective building-specific energy storage systems (i.e., passive and active technologies), advanced optimized control strategies for operating mechanical energy systems in buildings, and grid-interactive buildings. In addition, the journal will consider new equipment, systems, and methods that can enhance the resiliency of buildings associated to climate change and recurrent extreme events.

In particular, the journal will disseminate new developments of energy efficient heating and cooling systems that are able to adapt to large variations in weather conditions especially in urban areas.

SCOPE

- Design, Development and Research of Sustainable and Resilient Mechanical Systems and Equipment for Buildings
- Building Envelope Technologies
- Smart Building Structures
- Power Equipment and Technologies for Buildings
- Equipment for Heating, Ventilation and Air Conditioning
- Control Theory and Practice for Buildings Equipment and Systems
- District Cooling and Heating for Buildings
- Energy Engineering of High Rise Buildings
- Management of Building Energy Loads
- Equipment and Systems for Indoor Air Quality
- Sensor Systems for Building Equipment and Systems
- Energy Harvesting for Buildings and Cities
- Smart Energy Systems for Buildings, Cities, and Grids
- Hydraulics Systems for Buildings
- Fire Science and Fire-Protection Systems for Buildings
- Simulation of Building Equipment and Systems
- Elevators and Building Mobility Systems
- Architecture of Sustainable and Resilient Building Equipment and Systems
- Renewable Energy Systems for Buildings
- Economics of Buildings Equipment and Systems
